Dear Valued Customer:

The purpose of this letter is to respond to your request regarding information on California's Proposition 65 (Prop 65) and its application to the PolyOne product(s) above.

The California Safe Drinking Water and Toxic Enforcement Act of 1986 (California Health and Safety Code), better known as Proposition 65, requires the governor of California to publish a list of chemicals known to the state to cause cancer or reproductive toxicity. The California Environmental Protection Agency (Cal/EPA), which administers Proposition 65, has been delegated the authority to develop and revise this list. Proposition 65 establishes two prohibitions regarding use of listed chemicals. First, no person in the course of doing business may knowingly discharge or release a significant amount of a listed chemical into drinking water or into or onto land where it will pass into a source of drinking water. Second, no person in the course of doing business may knowingly expose any individual to a significant amount of a listed chemical without first providing a clear and reasonable warning to such individual.

It should be noted that simply because a component is subject to Prop 65 does not mean that a warning for the finished product is required. Prop 65 warning requirements are dependent on the anticipated level of exposure to components subject to Prop 65 resulting from foreseeable uses of a product. The warning requirements will only apply if the foreseeable and intended uses of a product containing these materials are likely to result in exposures above what are referred to as "significant risk" or "observable

effect” levels. A determination of “significant risk” or “observable effect” can only be made with full knowledge of the end uses and applications of the products.

PolyOne does not control or have complete knowledge of the end uses to which you or your customers put our materials. Therefore the decision to include or not include a Prop 65 notice must ultimately rest with your company and your customers. We hope the information provided is helpful as you decide how to proceed.

Please contact your PolyOne GLS Thermoplastic Elastomers sales representative should you need additional product support.

Sincerely,

Kristen Hardesty
Regulatory Manager

Product Name/Number

LC 466-019 / EM1003563562

This PolyOne product does not contain any chemical known to the State of California to cause cancer, or birth defects or other reproductive harm, in concentrations that require a warning notice under California's Proposition 65.

Product Name/Number

GLS 466-018 NATURAL / EM100356340S

GLS 466-096 NATURAL / EM100387850S

This product contains the below Prop 65 chemicals:

<u>Prop 65 Chemical</u>	<u>CAS #</u>	<u>% in Product</u>
Talc ¹	14807-96-6	<0.2%

¹ Does not contain asbestiform fibers. Only considered listed if substance contains asbestiform fibers.

Please note that we do not test for these substances.
